

Schneider Geospatial Acquires Systems Development Group

September 06, 2024

Align Capital Partners' ("ACP") portfolio company Schneider Geospatial, LLC ("Schneider Geospatial" or the "Company") acquired Systems Development Group ("SDG"), a provider of geo-centric property record and analysis solutions for local governments. SDG will join Schneider Geospatial and operate as an integrated business serving over 1,000 local government clients across 34 states.

SDG's popular Image Mate Online (IMO) offering and supporting services will become part of Schneider Geospatial's industry-leading Parcel Management solution portfolio. "We are excited to welcome SDG to Schneider Geospatial," says Jeff Corns, CEO of Schneider Geospatial. "The newly combined and integrated team will remain focused on delivering exceptional customer service and product innovation to all of our clients."

SDG's reputation for providing enhanced public access to real property information and outstanding customer support aligns perfectly with Schneider Geospatial's mission. The acquisition strengthens Schneider Geospatial's ability to deliver geo-centric solutions that address the unique needs of state and local governments and the citizens they serve.

John Kelly, President of SDG, expressed enthusiasm about joining Schneider Geospatial, stating, "We are thrilled to be a part of Schneider Geospatial's vision of transforming the GovTech industry. Our combined expertise and shared commitment to excellence will pave the way for groundbreaking advances in Parcel Management and Citizen Engagement."

SDG marks the fourth add-on for the Company since ACP acquired Schneider Geospatial in June of 2022. Partner Matt Iodice, Managing Partner Chris Jones, Vice President Andrew Foster and Associate Matt Sweet worked alongside management on the transaction.
